MERLIN STUWART

AI/ML & Full-Stack Software Developer | Python · React.js · RAG Systems & LLMs

Bangalore, India | +91 6379113226 | merlinstuwart05@gmail.com | linkedin.com/in/merlin-stuwart | github.com/Merlin-Stuwart

PROFESSIONAL SUMMARY

Junior Software Developer with 1+ year of hands-on experience building full-stack and AI-powered applications using Python, React.js, JavaScript, REST APIs, MySQL, and MongoDB. Delivered a production WhatsApp automation bot that cut manual agent response time by ~40%, and built RAG pipelines and fine-tuned LLMs for domain-specific Q&A systems. Trained Python Full-Stack Developer (JSpiders, 2023-2024) with a strong foundation in OOP, SDLC, and Agile/Scrum.

KEY SKILLS

Programming Languages: Python, JavaScript, TypeScript

Web & Frameworks: React.js, Node.js, REST API Development, HTML5, CSS3, Electron

AI / ML: Machine Learning, LLM Fine-Tuning, Retrieval-Augmented Generation (RAG), Vector Databases, NLP, Prompt Engineering

Databases: MySQL, MongoDB

Automation & Tools: Docker, WhatsApp Business API, n8n Workflow Automation, Git/GitHub, Power BI, Salesforce (CRM Basics)

Concepts & Practices: SDLC, Object-Oriented Programming (OOP), Agile/Scrum, Unit Testing, Debugging, API Integration, Version Control

WORK EXPERIENCE

Junior Software Developer — Wyzmindz Solutions Pvt Ltd *Mar 2025 – Present*

- Independently designed and delivered a client-facing WhatsApp automation bot as first solo project ownership, achieving successful production rollout and strong client satisfaction
- Build and integrate AI/ML components — including LLMs and RAG pipelines — into business applications, collaborating with cross-functional engineering teams
- Develop full-stack features using Python, React.js, REST APIs, and MySQL/MongoDB across multiple ongoing company projects

Project Management Intern — Salesforce Info Tech *2023 (1 Month)*

- Supported the Project Management team in tracking Salesforce-based project deliverables, gaining hands-on exposure to CRM workflows, documentation, and cross-team coordination

PROJECTS

WhatsApp-Based Consolidated Business Automation Bot (Autosherpa)

Tech: Node.js, Python, WhatsApp Business API, Docker

- Developed a Docker-containerized WhatsApp bot handling leads, bookings, and support workflows, reducing manual agent response time by ~40%
- Integrated AI-driven intent classification to cut first-response time from minutes to seconds

WhatsApp Automation Desktop Application

Tech: Electron, JavaScript/TypeScript, Node.js

- Built a desktop control app using Electron enabling non-technical staff to start/stop bot sessions and monitor multiple WhatsApp automation instances in real time, reducing manual oversight

NEET Preparation Assistant — Fine-Tuned LLM

Tech: Python, LLM Fine-Tuning, NLP

- Fine-tuned a custom LLM on NEET syllabus content (Physics, Chemistry, Biology) to build a domain-specific Q&A and doubt-solving assistant, reducing reliance on generic AI tools for exam prep

Suryajosvi Reflection Tracker

Tech: React.js, Python, Machine Learning, RAG, Vector Database, Docker

- Built a full-stack AI-powered reflection tracker using React.js and a RAG pipeline, backed by a vector database, to deliver personalized insights from user journal entries

EDUCATION

B.E. / B.Tech, Computer Science Engineering — Aarupadi Veedu Institute of Technology, Chennai *2019 – 2023*

Higher Secondary (12th) — Sri Vasavi Vidhyalaya Matriculation Higher Secondary School *2019*

CERTIFICATIONS & TRAINING

- Python Full Stack Development — JSpiders (2023–2024) | Microsoft Power BI | n8n Yellow Belt | Energy Swaraj Course
